*The new Wave in Noise*

# NW2G-D

## New Product Announcement

[www.noisewave.com](http://www.noisewave.com)

NoiseWave announces the immediate availability of the NW-2GD Dual-In-Line packaged amplified noise model. The unit features broadband frequency coverage from 10 MHz to 2 GHz. Power out is -5 dBm and the spectral flatness is +/- 2.0 dB. The unit operates with +15 Vdc and draws 100 mA.

Applications for these modules include built in test equipment, dithering for increased dynamic range of A/D converters, and as an economical source for broadband power.

The unit comes in an industry standard DIP package and is available in either 14 or 24 pins packages. Utilizing small internal parts count the unit is economically priced and delivery is typically from stock. Other voltages, output levels and frequencies are also available. Contact NoiseWave today to learn more about how this new product may fit your design needs.
